planet and record important facts and figures about them. \*This activity includes Pluto as a planet, even though it is now classified as a dwarf planet. Read more about Pluto's new status at our sister site. Fact Monster.

Touring the Solar System Printable (3rd Page 34/39

- 5th Grade Ωur SHORT ANSWER (2) points) Gravity is a major force in the solar system. Describe two effects that gravity has between objects in the solar system. (Note: DO NOT describe that gravity keeps objects from floating into space. Think about all the Page 35/39

other role 's gravity plays!) 25. EXTENDED RESPONSE (4 points) Compare Comets to Asteroids by completing the

Solar System Test -Plain Local School District Our solar system consists of our star, the Sun, and everything bound to Page 36/39

it by gravity — the planets Mercury, Venus, Earth, Mars, Jupiter, Saturn, Uranus and Neptune, dwarf planets such as Pluto, dozens of moons and millions of asteroids, comets and meteoroids.

Overview | Our Solar System – NASA Solar System Exploration Page 37/39

Our solar system is filled with a wide assortment of celestial bodies - the Sun itself, our eight planets, dwarf planets, and asteroids - and on Earth, life itself! The inner solar system is occasionally visited by comets that loop in from the outer reaches of the solar Page 38/39

system on highly elliptical orbits.In the outer reaches of the solar system, we find the Kuiper Belt and the Oort cloud.
