All recent developments of nitrides and of their technology are gathered here in a single book, with chapters written by world leaders in the field.

"Fashion by Design explains how the elements and principles of design relate to fashion, based on the philosophy of the Bauhaus Experiment of the 20s and 30s, which is the foundation for art education in the United States. The book is structured into three parts: the stages of the design process (inspiration, identification, conceptualization, exploration/refinement, definition/modeling, communication, and production); physical elements (such as line, shape, form, space, texture, light, pattern, color, and value); and theoretical principles (like balance, emphasis, rhythm, proportion, and unity) of design. This is reinforced by fashion designer profiles and illustrations covering art, architecture, and fashion. The book aims to improve the designer's eye for creating fashion and related art forms; to identify terminology used in the communication of fashion; and to show how other factors, such as the human form, clothing structure, historic silhouettes, fashion trends, culture, and industry trends, may impact the development of a line or a collection"--

Growing up near the Sabine, journalist Wes Ferguson, like most East Texans, steered clear of its murky, debris-filled waters, where alligators lived in the backwater sloughs and an occasional body was pulled from some out-of-the-way crossing. The Sabine held a reputation as a haunt for a handful of hunters and loggers, more than a few water moccasins, swarms of mosquitoes, and the occasional black bear lumbering through swamp oak and cypress knees. But when Ferguson set out to do a series of newspaper stories on the upper portion of the river, he and photographer Jacob Croft Botter were entranced by the river's subtle beauty and the solitude they found there. They came to admire the self-described "river rats" who hunted, fished, and swapped stories along the muddy water--plain folk who love the Sabine as much as Hill Country vacationers love the clear waters of the Guadalupe. Determined to travel the rest of the river, Ferguson and Botter loaded their gear and launched into the stretch of river that charts the line between the states and ends at the Gulf of Mexico.
