Child Language Acquisition: Contrasting Theoretical Approaches (Ambridge and Lieven (2011)), is one of the first innovative attempts to bridge the gap between the opposing claims of these theories. Throughout the book, a large number of case studies favoring one or the other approach are thoroughly analyzed. The

Early Theories. One of the earliest scientific explanations of language acquisition was provided by Skinner (1957). As one of the pioneers of Behaviorism, he accounted for language development by means of environmental influence. Skinner argued that children learn language based on behaviorist reinforcement principles by associating words with meanings.
