A revelatory consideration of the wide-ranging practice of one of the most influential American artists of the 20th century A pioneer of minimalism and conceptual art, Sol LeWitt (1928–2007) is best known for his monumental wall drawings. LeWitt's broad artistic practice, however, also included photography, artist's books, sculpture, and printmaking. From the familiar to the underappreciated aspects of the artist's oeuvre, this book examines the ways that LeWitt's work was multidisciplinary, humorous, philosophical, and even religious. Locating Sol LeWitt contains nine new essays that explore the artist's work across media and address topics such as

LeWitt's formative friendships with colleagues at the Museum of Modern Art in the early 1960s; his photographs of Manhattan's Lower East Side; his 1979 collaboration with Lucinda Childs and Philip Glass and its impact on his printmaking; and his commissions linked to Jewish history and the Holocaust. The essays offer insights into the role of parody, experimentation, and uncertainty in the artist's practice, along with contingency in relation to site, space, and movement. Together, these studies shed light on the full scope of LeWitt's creativity and offer a multifaceted reassessment of this singular and influential artist.

Whether you live in a bustling home where a family of

different ages with varying tastes and interests needs to be accommodated, in a compact city pied À terre, or in a country or seaside retreat, you will find inspiration here for your ideal living space.Â There are four chapters on different areas of the houseâ€”Cook and Eat features kitchens and dining areas, Relax and Socialize covers living rooms, Work and Create includes home offices and studios, and Sleep and Bathe, of course, shows bedrooms and bathrooms. A final chapter, Store and Display, shows how different areas of the home can be used to show off your treasures and store your collections. Each chapter features rooms of different stylesâ€”from sleek and minimal, to Aladdin's caves belonging to collectors of

anything and everything, thrifty chic-style rooms furnished with second-hand buys, and renovated homes with no expense sparedâ€”as well as displays featuring designer items alongside inherited family heirlooms. However, the one thing every room has in common, whatever its style or purpose, is that it has been furnished and decorated with great attention to detail.

Since antiquity, Roman architecture and planning have inspired architects and designers. In this volume, Diane Favro and Fikret Yegül offer a

comprehensive history and analysis of the Roman built environment, emphasizing design and planning aspects of buildings and streetscapes. They explore the dynamic evolution and dissemination of architectural ideas, showing how local influences and technologies were incorporated across the vast Roman territory. They also consider how Roman construction and engineering expertise, as well as logistical proficiency, contributed to the making of bold and exceptional spaces and forms. Based on decades of first-hand examinations of ancient sites throughout the Roman world, from Britain to Syria, the authors give close accounts of many sites no longer extant or accessible. Written in a lively and

accessible manner, Roman Architecture and Urbanism affirms the enduring attractions of Roman buildings and environments and their relevance to a global view of architecture. It will appeal to readers interested in the classical world and the history of architecture and urban design, as well as wide range of academic fields. With 835 illustrations including numerous new plans and drawings as well as digital renderings.

The rapid conversion of land to urban and suburban areas has profoundly altered how water flows during and following storm events, putting higher volumes of water and more pollutants into the nation's rivers,

lakes, and estuaries. These changes have degraded water quality and habitat in virtually every urban stream system. The Clean Water Act regulatory framework for addressing sewage and industrial wastes is not well suited to the more difficult problem of stormwater discharges. This book calls for an entirely new permitting structure that would put authority and accountability for stormwater discharges at the municipal level. A number of additional actions, such as conserving natural areas, reducing hard surface cover (e.g., roads and parking lots), and retrofitting urban areas with features that hold and treat stormwater, are recommended.
