Inherent in measuring a broadly-based, multi-dimensional concept of poverty impose severe restrictions on the number and the type of attributes that constitute poverty. The most comprehensive and therefore logical starting point in an attempt to capture the concept of poverty is Sen's "capabilities and functionings" theoretical framework.

An absolute requirement. A household is deprived for a given indicator if they fail to satisfy a given 'cutoff'. A household is assigned a 'deprivation score' determined by the number of indicators they are deprived in and the 'weights' assigned to those indicators. Each dimension is typically given an equal weighting, and each indicator within the dimension is also typically weighted equal
