"This intimate, moving, and timely collection of essays points the way to a world in which the burden of grief is shared, and pain is reconfigured into a powerful force for social change and collective healing." —Astra Taylor, author The People's Platform "A primary message here is that from tears comes the resolve for the struggle ahead." —Ron Jacobs, author of Daydream Sunset "Rebellious Mourning uncovers the destruction of life that capitalist development leaves in its trail. But it is also witness to the power of grief as a catalyst to collective resistance." —Silvia Federici, author of Caliban and the Witch We can bear almost anything when it is worked through collectively. Grief is generally thought of as something personal and insular, but when we publicly share loss and pain, we lessen the power of the forces that debilitate us, while at the same time building the humane social practices that alleviate suffering and improve quality of life for everyone. Addressing tragedies from Fukushima to Palestine, incarceration to eviction, AIDS crises to border crossings, and racism to rape, the intimate yet tenacious writing in this volume shows that mourning can pry open spaces of contestation and reconstruction, empathy and solidarity. With contributions from Claudia Rankine, Sarah Schulman, David Wojnarowicz, Leanne Betasamosake Simpson, David Gilbert, and nineteen others. Cindy Milstein is the author of Anarchism and Its Aspirations, co-author of Paths toward Utopia: Graphic Explorations of Everyday Anarchism, and editor of the anthology Taking Sides: Revolutionary Solidarity and the Poverty of Liberalism.

The Model Chapter on Infant and Young Child Feeding is intended for use in basic training of health professionals. It describes essential knowledge and basic skills that every health professional who works with mothers and young children should master. The Model Chapter can be used by teachers and students as a complement to textbooks or as a concise reference manual.

This lush book of photography represents National Geographic's Photo Ark, a major cross-platform initiative and lifelong project by photographer Joel Sartore to make portraits of the world's animals-especially those that are endangered. His powerful message, conveyed with humor, compassion, and art- to know these animals is to save them.Sartore intends to photograph every animal in captivity in the world. He is circling the globe, visiting zoos and wildlife rescue centers to create studio portraits of 12,000 species, with an emphasis on those facing extinction. He has photographed more than 6,000 already and now, thanks to a multi-year partnership with National Geographic, he may reach his goal. This book showcases his animal portraits- from tiny to mammoth, from the Florida grasshopper sparrow to the greater one-horned rhinoceros. Paired with the eloquent prose of veteran wildlife writer Douglas Chadwick, this book presents a thought-provoking argument for saving all the species of our planet.

Autistic people and musical individuals often have perfect pitch, a gift they were born with. The musical gift may be accompanied with learning differences such as reading comprehension problems, trouble with mathematics, and significant difficulties in learning how to read music. This book was written by a music therapist and an autistic researcher, and is endorsed by leading experts in the field of autism and special-needs education. The Rancer Method is presented as page-by-page instructions to be implemented with readily-available method books so that every piano teacher can follow it and do well by their students. "By focusing on the abilities rather than the deficits of people with learning, perceptual, motor, and other differences, Kupferstein and Rancer have developed a revolutionary piano pedagogy that will empower individuals with autism and other differences by unleashing the power of what can be done." Stephen M. Shore, Ed.D. Internationally known professor, consultant, speaker, and author on issues related to the autism spectrum and special education. Person on the autism spectrum p>"This book will help the quirky kid who is different to be successful in music. This method may help open musical doors for many individuals on the autism spectrum." Temple Grandin, author Thinking in Pictures and The Autistic Brain.

"Popular conservative radio host and blogger Ed Morrissey argues that the fate of conservatism hangs on the 2016 election--and on a mere seven counties that will decide the whole race. Together, these counties are home to only 5 million people (that is, 1.5% of the American population), but it was in these communities that Barack Obama won the 2008 and 2012 elections, and in 2016, they hold the key to the states Republicans must win in order to take back the White House. For Republicans, this is bad news and good news. Bad news, because all seven of the counties pulled for Obama in one or both of the last two elections; good news, because they all voted for George W. Bush in 2004, and due to the Democrats' misadventures under the Obama administration, the door is open for Republicans to win these counties--and the presidency--once again, making a decisive mandate against progressivism for the generation to come. Going Red will take readers inside these battlegrounds, weaving never-before-seen data into human portraits that illuminate why these communities have changed from Republican to Democrat, why the Obama administration has disappointed them, and what conservatives can do to win them back in this election cycle--and beyond. With echoes of Nate Silver, Dick Morris, and Charles Murray, this is a timely and crucial book for anyone who cares about conservatism's future"--

Adopt the investment strategy that built Warren Buffett's fortune Invest Like a Guru provides an invaluable resource for high-quality-focused value investing, with expert insight and practical tools for implementation. Written by the man behind GuruFocus.com, this book expands on the site's value strategies and research tools to provide a primer for those exploring pathways to higher returns at lower risk. The book begins with an insightful explanation of high-quality-focused value investing concepts, then quickly moves into practical, detailed guidance on analysis, valuation, key factors, and risks to avoid. Case studies demonstrate real-world application of various analysis methods, and the discussion walks you through important calculations using real examples. Author Charlie Tian draws upon his own experiences and lessons learned to provide true insight on high-quality-focused value investing as a strategy, providing both reference and expert advice in this singularly useful guide. Warren Buffett once said, "I would rather buy good companies at fair prices than buy fair companies at good prices." That's how he built his fortune, and his method is what we now call high-quality-focused value investing. This book shows you how to determine what constitutes "good companies" and "fair prices," with practical tools for real-world application. Learn the principles and concepts of high-quality-focused value investing Understand the analysis process and valuation of prospective investments Avoid the value traps that can trigger permanent losses Study clear examples of key ratios and calculations We can't all become the next Warren Buffett, but we can boost returns while reducing risk using the right investment strategy. High-quality-focused value investing provides a path to profit, and Invest Like a Guru is the one-of-a-kind guidebook for getting on track.

The world is in dire need of change. People are hurting. People are turning to empty promises searching for answers. All along, we have the answer: Jesus. In Holiness Revolution, your eyes will be awakened to the need for change in this world. You will be challenged to live a life of radical discipleship that brings that change. It s time to stop making excuses and start taking action.

The MacCAT-CR provides a structured format for capacity assessment that is adaptable to the particulars of any given research project. With the introduction of the MacCAT-CR, researchers enrolling human participants in their studieshave available for the first time a reliable and valid means of assessing their potential subject's capacity to consent to participation. The MacCAT-CR can typically be administered in 15-20 minutes. Beginning with project-specific disclosures to potential participants, the MacCAT-CR measures the four generally accepted components of decision-making competence: understanding, appreciation, reasoning, and the ability to express a choice. Quantification of subjects' responses permits comparisons across subjects and subject groups, and allows the MacCAT-CR to be used for not only for screening individual participants but also for conducting research on the characteristics of subject populations and for assessing the effectiveness of interventions designed to increase subjects' capacities.

Using numerous high-quality illustrations, this volume assesses strengths and limitations of techniques for the imaging of pancreatitis. Ultrasound, computed tomography, magnetic resonance imaging and interventional imaging are considered separately in the settings of acute and chronic pancreatitis, with an additional section on imaging of complications. The significance of the imaging findings for clinical and therapeutic decision making is clearly explained, and protocols are provided to help obtain the best possible images.
