File Type PDF

Waste

~~How to Waste
Less~~

At present, the recycling of polystyrene (or EPS foam)

basically

follows the

following

process:

Segregation -

EPS foam

products are

separated from

File Type PDF

Waste

other wastes and then sorted.

Compaction - The segregated EPS

foam products

are fed to a compactor in

order to reduce its volume.

~~Recycling of~~

~~Polystyrene~~

~~Wastes | EcoMENA~~

~~Polystyrene~~

File Type PDF

Waste

packaging.

Polystyrene is a type of plastic which is not

commonly

recycled. Most people readily

recognise

expanded

polystyrene

which is

sometimes used

for take-away

food containers

File Type PDF

Waste

and to package white goods like microwaves.

Expanded polystyrene should be placed in the waste bin. Polystyrene is also sometimes used for other food packaging like multi-pack yoghurts.
